

Mobile Program Prevention Clinics Summary

Location: Tribal Communities

Unique Kids Served: 16,928

Date: January 2013 - December 2022

Value of Dental Care: \$6,987,322

Patient Visits:

35,498

All children were provided a toothbrush, toothpaste, and a lesson on how to care for their teeth at home.

Sealants Placed

60,419

Dental sealants are thin coatings applied to molar (back) teeth to prevent cavities. Generally for kids age 5-14, sealants reduce the risk of tooth decay by up to 80% for several years.

Fluoride Varnish Treatments

35,159

Fluoride varnish is a temporary gel applied to teeth to make them stronger and prevent decay. The treatment is proven to reduce cavities.

Number of Cleanings

33,135

Plaque removal and polish.

All children seen were referred to a dentist as part of good oral health practice. Children with urgent needs were provided help getting a dentist appointment.

THANK YOU

Thank you to all of the schools, Head Starts, and other community organizations for letting the Delta Dental Mobile Program care for their children. Working together we can prevent tooth decay and infection through screening, preventive care, and education!
