Health *through* Oral Wellness®

Visit a participating dentist to take an oral health risk assessment. You may be eligible for additional benefits for preventive care.

Prevention Pays

Many preventive care services are still covered even when the plan's annual maximum benefit has been reached.

Balance Billing Protection

In-network dentists may not charge the difference if the fee for a covered service is higher than the plan's allowed amount.

See other side for information on plan features.

Health *through* Oral Wellness®

Health *through* Oral Wellness® is a unique, patient-centered program that adds benefits to a Delta Dental plan based on individual oral health needs. A Delta Dental network dentist trained in Health *through* Oral Wellness® will conduct a clinical risk assessment during a regular preventive visit. The assessment measures the risk and severity of periodontal disease, and the risk of tooth decay.

If the assessment determines a member is at risk for tooth decay, additional benefits include fluoride treatments, sealants, and oral hygiene instruction. If a member is at risk for periodontal (gum) disease, has periodontal disease or has had periodontal surgery, the member will be eligible for two additional cleanings* and four fluoride treatments.

If a member has any of the following health conditions, they are eligible for additional benefits.

- Diabetes (2 additional cleanings*)
- High-risk cardiac care (2 additional cleanings*)
- Kidney failure or dialysis (2 additional cleanings*)
- Cancer-related treatment - chemotherapy or radiation (2 additional cleanings* and 2 applications of fluoride varnish)
- Suppressed immune system (2 additional cleanings* and 2 applications of fluoride varnish)
- Rheumatoid arthritis (2 additional cleanings*)
- Stroke (2 additional cleanings*)
- Pregnancy (1 additional cleaning* during the time of pregnancy)

** Cleanings can either be a general cleaning (prophylaxis) or a periodontal maintenance cleaning. Periodontal maintenance cleanings are typically covered under the "Root Canals and Gum Disease Treatments" category, not the "Preventive Care" category.*

Prevention Pays

The Prevention Pays feature exempts diagnostic and preventive dental services and some periodontal (gum disease) services from the calculation of the plan's annual maximum benefit. That means preventive services like exams, cleanings, x-rays, and periodontal maintenance cleanings are covered when the plan's annual maximum benefit has been reached. It also means more benefits are available to help pay for treatment procedures like cavity fillings, crowns, and root canals.

Balance Billing Protection

Your Delta Dental of South Dakota plan protects you from balance billing. Balance billing is what happens when a dentist's fee for a certain service is more the plan's allowed amount, and the dentist bills you for the difference.

Delta Dental's network dentists have agreed to set fees, so you shouldn't be balance billed while visiting a dentist in your plan's network. However, you are still responsible for paying any applicable deductibles, coinsurance, amounts over your annual maximum, and charges for non-covered services. You may be balance billed if you visit a dentist outside of Delta Dental's networks.
