Plan requirements

This plan is for ten or more employees. The employer pays the single cost for each employee and all eligible employees should be enrolled. The employer determines the length of employment and number of hours required for an employee to be eligible.

Health through Oral Wellness®

Health through Oral Wellness® is a unique, patient-centered program that adds benefits to a Delta Dental plan based on individual oral health needs. A Delta Dental network dentist trained in Health through Oral Wellness will conduct a clinical risk assessment during a regular preventive visit. The assessment measures the risk and severity of periodontal disease, and the risk of tooth decay.

If the assessment determines a member is at risk for tooth decay, additional benefits include fluoride treatments, sealants, and oral hygiene instruction. If a member is at risk for periodontal (gum) disease, has periodontal disease or has had periodontal surgery, the member will be eligible for two additional cleanings* and four fluoride treatments.

If a member has any of the following health conditions, they are eligible for additional benefits.

- Diabetes (2 additional cleanings*)
- High-risk cardiac care (2 additional cleanings*)
- Kidney failure or dialysis (2 additional cleanings*)
- Cancer-related treatment - chemotherapy or radiation (2 additional cleanings* and 2 applications of fluoride varnish)
- Suppressed immune system (2 additional cleanings* and 2 applications of fluoride varnish)
- Rheumatoid arthritis (2 additional cleanings*)
- Stroke (2 additional cleanings*)
- Pregnancy (1 additional cleaning* during the time of pregnancy)

* Cleanings can either be a general cleaning (prophylaxis) or a periodontal maintenance cleaning. Periodontal maintenance cleanings are typically covered under the “Endodontics and Periodontics” category, not the “Diagnostic and Preventive Services” category.
